- Waterproof compression drybag achieving a small packing volume for sleeping bags, mattresses, tents, clothing etc.
- Excessive air can escape through the open valve during packing
- Then close the sealing lip, roll the drybag 3 times, close the buckles, close the valve
- Excessive air is not transported and the equipment can be packed requiring very little space
- Can also be used as buoyancy means
- Slider available as spare part
- Can be easily cleaned on the inside and outside

CAUTION: The roll closure must be rolled at least three times before the bag is fully submerged under water
